About the Author	ii
Foreword	vi
Preface	viii
Preface to the First Edition	xiii
Distinctive Features	xv
An Information Systems Framework	xvi
Management Information Systems Course	xvii
Syllabus for MBA/PGDM	
Information Technology for Management	xx
Course Syllabus	

Module 1

Business Organisation and Role of Information Technology

Case 1: IT for Success 2

1. Introduction to Information Technology	5
Introduction	5
Why Information Technology?	6
Opening of Global Markets	7
Information Systems	8
Organisation and Management	13
Management Levels	15
Management Roles	16
Organisational Functions	17
Types of Information Systems	18
Transaction Processing System (TPS)	18
Management Information Systems (MIS)	20
Office Automation Systems (OAS)	21
Decision Support Systems (DSS)	21
Executive Support System (ESS)	22
Expert Systems (ES)	23
Examples of TPS, MIS and DSS	24
Knowledge Work Systems (KWS)	24
Where Does Technology Go From Here?	24
Autonomous Things	25
Augmented Analytics	26

Digital Twins	26
Edge Computing	26
Blockchain	26
Immersive Experience	27
Smart Spaces	27
Event Driven	27
Continuous Adaptive Risk and Trust	27
Anything-as-a-Service (XaaS)	28
Virtual Assistants	28
Internet of Things (IoT)	28
Prescriptive Analytics	28
Learning Outcomes	29
Self-Study Questions	31
Review Questions	32
Questions for Discussion	33
Application Exercises	33
Group Projects	33
Caselets	34

2. Strategic Information Systems

Introduction	36
Phases of Information Systems	37
Strategic Information Systems	39
Value Chain Model	42
Competitive Forces Models	45
Wiseman's Strategic Model	52
IT for Competitive Advantage	53
Implementing Strategic Information Systems	
Learning Outcomes	59
Self-Study Questions	61
Review Questions	62
Questions for Discussion	63
Application Exercises	63
Group Projects	63
Caselets	63

3. Technology Infrastructure

Introduction	66
What are Computers?	67

Evolution of Computers	68		
Z2 Zuse Computer	68		
ENIAC Computer	69		
UNIVAC Computer	69		
Computer Generations	70		
First Generation—Vacuum Tubes (1939–1959)	70		
Second Generation—Transistors (1959–1965)	70		
Third Generation—Integrated Circuits (1965–1971)	70		70
Fourth Generation—PCs and VSLI (1971–1991)	71		
Fifth Generation—Artificial Intelligence and Internet (1991 Till Date)	71		
Classification of Computers	72		
According to Function	73		
According to Capabilities	74		
Computer Architecture	75		
Central Processing Unit	76		
Memory	78		
Input/Output Devices	80		
3D Printing	82		
Secondary Storage	82		
Computer Software	85		
System Software	86		
Application Software	86		
Packaged Software	86		
Software Generations	86		
First Generation	87		
Second Generation	87		
Third Generation	87		
Fourth Generation	87		
Fifth Generation	87		
System Software	88		
Operating System	89		
Objectives of Operating Systems	89		
Services Provided by Operating System	90		
Operating System Functions	90		
Control and Processing Programs	91		
Types of Operating Systems	91		
Programming Languages	93		
Machine Language	93		
Assembly Language	93		
High Level Languages	94		
Fourth Generation Language	96		
Object-Oriented	96		
Programming Translators	97		
Assembler	98		
Compilers	98		
Interpreters	98		
Application Software	99		
Examples of Application Software	99		
Emerging Trends and Issues	103		
Learning Outcomes	107		
Self-Study Questions	110		
Review Questions	111		
Questions for Discussion	111		
Application Exercises	112		
Group Projects	112		
Caselets	112		
4. Networks and Telecommunication Systems			118
Introduction	118		
Networks	119		
Types of Networks	119		
Network Topology	123		
Star Topology	123		
Ring Topology	123		
Bus Topology	123		
Tree Topology	124		
Mesh Topology	124		
Network Components	126		
Network Connectivity	126		
Hardware Devices	132		
Data Communication	135		
Modulation, Demodulation, and Modems	137		
Types of Analog Modulations	137		
Types of Digital Modulations	138		
Communication Channels	138		
Channel Configurations	138		
Channel Sharing	139		
Data Transmission	141		
Communication Channel Bandwidths	141		
Data Transmission Methods	142		
Modes of Data Transmission	143		
Data Communication Standards	144		
OSI Model	144		
TCP/IP Protocol	146		
Network Architectures	146		
Centralised Architecture	146		
Distributed Architecture	146		
Peer-to-Peer Network	150		
Cluster Computing	151		
Grid Computing	151		
Internet, Intranet and Extranet Applications	151		
Internet	152		
Internet of Things (IoT)	154		
Intranet	156		
Extranet	156		

Virtualisation 157
 Why Virtualisation? 158
 Benefits of Virtualisation 158
 Broad Categories of Virtualisation 159
 Types of Virtualisation 160
 Cloud Computing 161
 What is Cloud Computing? 161
 Benefits of Cloud Computing 161
 Benefits of a Cloud 163
 Cloud Computing Models 163
 Types of Clouds 165
 Cloud Computing Challenges 166
 Learning Outcomes 169
 Self-Study Questions 172
 Review Questions 172
 Questions for Discussion 173
 Application Exercises 173
 Group Projects 173
 Caselets 174

Module 2

Inter and Intra-organisational Systems

Case 2: Enterprise System 178

5. E-Business Models 181
 Introduction 181
 Concepts of E-Business and E-Commerce 182
 Goals of E-Business 183
 Increasing Profitability 183
 Increasing Customer Satisfaction 185
 Increasing Employee Motivation 185
 Improving Supplier Relationships 185
 Characteristics of E-Business 185
 Categories of E-Business Solutions 186
 Business-to-Business (B2B) 186
 Business-to-Consumer (B2C) 187
 Consumer-to-Consumer (C2C) 188
 Consumer-to-Business (C2B) 188
 E-Business Models 188
 Broker Model 189
 Auction Brokers 189
 Advertising Models 190
 Portal 190
 Infomediary Models 190
 Merchant Models 191
 Community Models 191
 E-procurement 191
 E-Business Strategy 192
 Building E-Business Models 192

Market Opportunity Analysis 192
 Value Proposition 193
 Online Strategy 194
 Resource Management 194
 Sources of Revenue 195
 E-Business Competitive Advantage 195
 E-Business Security Issues 196
 Network Security 197
 Hacking 197
 Firewall 199
 Data Security 199
 Cryptography 204
 Cryptographic Keys 204
 Blockchain - The New Secured Technology 205
 Business Applications of Blockchain 206
 Mobile Commerce 208
 Role of m-Commerce in Business 210
 Advantages of m-Commerce 210
 Challenges of m-Commerce 210
 Legal Framework 212
 Key Policy Issues 212
 Indian Cyber Law (IT Act) 213
 Learning Outcomes 215
 Self-Study Questions 217
 Review Questions 218
 Questions for Discussion 218
 Application Exercises 219
 Group Projects 219
 Caselets 219

6. Enterprise Systems
 Introduction 221
 Integrated Information Systems 223
 Enterprise Resource Planning (ERP) 225
 ERP Components 227
 Customer Relationship Management (CRM) 228
 Supply Chain Management 228
 Characteristics of an ERP System 228
 Advantages and Disadvantages of ERP 228
 Implementing an ERP System 228
 Why ERP Projects Fail? 234
 Open Source ERPs 235
 Customer Relationship Management (CRM) 237
 Extracting Diamond from CRM 237
 Creating Customer Value 238
 Benefits of CRM 240
 Why CRM Projects Fail? 240
 CRM Solutions 241
 E-CRM 243
 Open Source CRM Solutions 245

Supply Chain Management (SCM) 246	
What is Supply Chain Management? 247	
Elements of a Supply Chain 248	
IT and Supply Chain Management 249	
Importance of ERP in SCM 250	
Open Source SCM Tools 252	
Learning Outcomes 253	
Self-Study Questions 255	
Review Questions 257	
Questions for Discussion 257	
Application Exercises 257	
Group Projects 258	
Caselets 258	
7. Decision Support Systems 263	
Introduction 263	
Decision-Making 264	
The Decision Environment 265	
Approaches to Decision-making 265	
Optimising 265	
Satisficing 266	
Organisational 266	
Political 267	
Maximax 267	
Maximin 267	
Decision-making Procedure 267	
Problem Identification 267	
Collect the Facts 267	
Generate Alternatives 267	
Evaluate each Alternative 267	
Make the Decision 268	
Types of Decision-Making 268	
Decisions Taken Under Conditions of Certainty (Structured Decisions) 268	
Decisions Taken Under Conditions of Risk (Semi-structured Decisions) 268	
Decisions Taken Under Conditions of Uncertainty (Un-structured Decisions) 269	
Decision Models 269	
Modelling Process 269	
Modelling Characteristics 270	
Decision Support Systems (DSS) 271	
Characteristics of DSS 272	
Types of DSS 272	
Group Decision Support System (GDSS) 273	
Data Warehouse 275	
Components of Data Warehouse 275	
Creating Data Warehouse 276	
Process of Data Warehousing 278	
Data Warehouse Structure 279	
Data Analysis using Data Warehouse 280	
Big Data 280	
NoSQL Databases 281	
Online Analytical Processing (OLAP) 282	
Relational OLAP 282	
Multi-dimensional OLAP 283	
Data Mining 285	
Scope of Data Mining 286	
Extracting Knowledge 289	
Data Mining Tools 290	
Open Source Data Mining Tools 291	
Learning Outcomes 292	
Self-Study Questions 295	
Review Questions 296	
Questions for Discussion 296	
Application Exercises 297	
Group Projects 298	
Caselets 298	
8. Knowledge Management and Intelligent Systems 301	
Introduction 301	
Intelligent Systems 303	
Artificial Intelligence 303	
Applications of AI 304	
From AI to ML to DL 310	
Future of AI 313	
Knowledge Management 313	
Value of Knowledge Management 315	
Characteristics of Knowledge Management 316	
Advantages of Knowledge Management 316	
Components of Knowledge Management 317	
Steps Involved in Creation of KM System 317	
Business Intelligence (BI) 318	
Aligning BI Systems 321	
Stages in Business Intelligence Process 323	
Intelligent Business 323	
Role of Metadata 326	
Social Media Analytics 327	
Competitive Intelligence 329	
Value of Competitive Intelligence 329	
Role of CI in Business 330	
Learning Outcomes 331	
Self-Study Questions 334	
Review Questions 334	
Questions for Discussion 335	
Application Exercises 335	
Group Projects 335	
Caselets 335	

**Module 3
Implementing Information Systems**

Case 3: Managing IT 340

9. Planning and Implementing Information Systems 343

Introduction 343

Information System Planning (ISP) 345

Four Stages of IS Planning 346

IS Planning Methodologies 346

Developing Information System 350

System Development Phases 353

Initiation Phase 353

Planning/Analysis Phase 354

Design Phase 356

Development Phase 359

Testing Phase 361

Implementation Phase 362

Maintenance Phase 363

System Development Methodologies 363

Waterfall Model 364

Prototyping Model 365

Spiral Methodology 366

Extreme Programming 367

Rapid Application Development Model 368

Component Assembly Model 369

Joint Application Development (JAD)

Methodology 369

Rational Unified Process (RUP)

Methodology 369

Design Thinking 370

The Five Stages of Design Thinking 370

Design Thinking - A Non-linear Model 371

Computer-aided Software Engineering 373

Capability Maturity Model Integration 373

Level 1-Initial 374

Level 2-Repeatable 374

Level 3-Defined 375

Level 4-Managed 375

Level 5-Optimising 375

CMMI Components 376

Learning Outcomes 376

Self-Study Questions 378

Review Questions 379

Questions for Discussion 379

Application Exercises 380

Group Projects 380

Caselets 381

10. Managing Information Systems 383

Introduction 383

IT Infrastructure Management 384

IT Service Management 385

Goal of IT Service Management 386

Information Technology Infrastructure Library (ITIL) 387

What is ITIL? 388

Benefits of ITIL 388

COBIT-An IT Governance Tool 400

IT Governance Focus Areas 401

COBIT Framework 403

Why COBIT? 403

How COBIT Fulfill the Need? 404

COBIT's Acceptability 405

Role and Responsibilities of Chief Information Officer (CIO) 406

The Changing Role of the CIO 407

IT Roles and Responsibilities 411

Business Continuity Planning 412

Roles and Responsibilities for BCP 419

Performance of BCP Review 420

BCP Related Policies and Processes 421

Learning Outcomes 423

Self-Study Questions 427

Review Questions 428

Questions for Discussion 428

Application Exercises 428

Group Projects 429

Caselets 430

Module 4

Application Tools for Data Analytics

Case 4: IT for Decision Making 434

11. Excel-Based Decision Models 437

Introduction 437

Understanding Microsoft Excel 438

Microsoft Excel Screen Elements 438

Moving Around a Worksheet 439

Selecting a Cell 440

Selecting Range of Cells 441

Entering Data in a Selected Cell 441

Insert Cells, Rows, and Columns 443

Delete Cells, Rows and Columns 443

Align Cell Entries 443

Cut, Copy and Paste 443

Saving, Opening and Closing files 445

Formulas 446

AutoSum 446

Calculate an Average 447

Find the Lowest Number 448

Find the Highest Number 448

Count the Numbers in a Series of Numbers

Combining Data from Multiple Cells 449

Finding Empty Cells 449

Cell Referencing 450

Sorting and Filtering Data 451
 Creating and Managing Charts 453
 Visual Analysis using Sparklines 455
 Working with Multiple Worksheets 457
 Validating Data 457
 Protecting Cells 458
 Function Wizard (fx) 459
 IF Function 459
 What-if Analysis 460
 Sensitivity Analysis (Data Tables) 461
 Sensitivity Analysis with Scenario Manager 462
 Evaluating Investments (Net Present Value (NPV)) 464
 What is Net Present Value? 465
 Evaluating Project Investment Decisions using IRR 466
 Lookup Functions 467
 Auditing Tool 468
 Count Functions 470
 The SUMIF Function 471
 Creating Subtotals 472
 Pivot Tables to Describe Data 473
 Creating Dashboards using Conditional Formatting 477
 Highlighting Cells 477
 Clear Rules 479
 Conditional Formatting with Formulas 479
 Resource Optimisation 480
 Transportation Models 482
 Monte Carlo Simulation 483
Learning Outcomes 485
Self-Study Questions 487
Review Questions 487
Questions for Discussion 487
Application Exercises 488
Group Projects 493
Caselets 494

12. Managing Database Systems

499

Introduction 499
 Data Processing 500
 Data Processing Methods 501
 Data Processing Activities 501
 Data Organisation 502
 File Management System 502
 File Organisation 504
 Types of File Organisation 504
 Database Management System 506
 The Database 506
 DBMS—A Concept 507
 Components of DBMS 508

Advantages and Disadvantages of Database Management System 508
 Database Models 509
 Database Normalisation 514
 Rental Database Table 514
 First Normal Form (1NF) 514
 Second Normal Form (2NF) 515
 Third Normal Form (3NF) 516
 Boyce/Codd Normal Form 516
 Fourth Normal Form (4NF) 516
 Fifth Normal Form (5NF) 517
 Entity Relationship Models 517
 E-R Diagrams 518
 Creating and Managing Databases using Microsoft Access 519
 Advantages of Access 519
 Disadvantages of Access 519
 Starting Microsoft Access 519
 Navigation Pane and Access Objects 520
 Access Objects 521
 Creating Databases 522
 Managing Database Records 529
 Sorting Records 529
 Selecting Records 530
 Select using Filters 530
 Computing Totals 530
 Database Query 530
 Display All Records and All Fields 532
 Change from Datasheet View to Query Design View 532
 Selecting Columns 532
 Removing Column 533
 Printing Query Output 534
 Parameter Queries 534
 Expression Query 535
 Action Queries 535
 Make-Table Queries 535
 Delete Queries 536
 Append Queries 536
 Update Queries 536
 Crosstab Queries 536
 Forms 537
 Creating Forms 537
 Data Entry on Form 538
 Multiple Item Form 539
 Split Form 540
 Reports 540
 Use the Report Wizard 541
 Group 541
 Sort and Summarize 542
 Layout and Orientation 543
 Style 543

- Create a Title 543
- Managing Reports in Design View 544
- The Print Preview 544
- The Layout View 544
- Modify a Report 545
- Apply an Auto Format 546
- The Page Header and Footer 546
- The Detail Section 547
- The Report Header and Footer 547
- Display Only 548
- Macro 548
- Module 549

- Learning Outcomes 549
- Self-Study Questions 553
- Review Questions 553
- Questions for Discussion 554
- Application Exercises 554
- Group Projects 554
- Caselets 555

13. SPSS—A Statistical Decision Tool 557

- Introduction 557
- Business Value of SPSS 558
 - Getting Started with SPSS 558
 - The SPSS Windows and Files 560
- Managing Data 561
 - Defining or Redefining Variables 562
 - Saving Data 564
 - Opening Existing Data File 565
- Reading Data from Other Programs 565
 - Microsoft Excel File 565
 - Reading Tab-Delimited Data File 565
 - Defining Value Labels and Missing Values 566
- Analyzing Data 568
 - Frequency Tables 568
 - The Output Viewer 569
 - Impact of Variable Values & Missing Values on Frequency Distribution 570
 - Generating Summary Statistics 571
 - Comparing Means 572
- Changing Data 574
 - Recoding Variables 575
 - Automatic Recode 577
 - Count 578
 - Computing a New Variable 578
 - Working with Dates 579
- Selecting and Sorting Data 580
 - The Data Menu 580
 - Creating Charts 582
 - Creating Histograms 583

- Creating Cross-Tables 584
 - Using the Pivot Table Editor 587
- Linear Regression 588
- Multiple Response Analysis 590
 - Multiple Response Define Sets 591
 - Multiple Response Frequencies 591
 - Multiple Response Crosstabs 591
 - Decision Chart 592
- Learning Outcomes 593
- Self-Study Questions 595
- Review Questions 595
- Questions for Discussion 595
- Application Exercises 597
- Group Projects 598
- Caselets 598

14. Data Analytics Tools and Techniques

- Introduction 600
- Data Analytics 601
 - Business Applications of Data Analytics Across Industries 603
 - Steps for Data Analysis 605
- Business Analytics (BA) 605
 - Why Business Analytics? 607
 - Benefits of Implementing Business Analytics 607
 - Business Intelligence Vs. Business Analytics 607
 - Four Stage Business Analytics Model (Types of Analytics) 608
 - Implementing Business Analytics 609
- Data Analytics Techniques 611
 - Data Analytics Tools 615
- Data Visualization 617
 - Data Visualization Techniques 618
 - Choose the Correct Chart Type 619
 - Tips & Tricks 620
 - Dashboards 620
 - Tableau - Quick Guide 622
- Learning Outcomes 642
- Self-Study Questions 644
- Review Questions 644
- Questions for Discussion 645
- Application Exercises 645
- Group Projects 646
- Caselets 646

Glossary 650
