CONTENTS

Chapter-1 RESEARCH NEEDS AND RESEARCH AREAS IN ENVIRONMENTAL ECONOMICS	1-17
1.1 Introduction	
1.2 Research Needs	
1.3 Environmental Behavior and Decision-Making	
1.4 Market Mechanisms and Incentives in Environmental Research	
1.5 Integration of Social, Biological, and Physical Sciences in Environmental Research	
1.6 Biodiversity and Nature Conservation Research Issues	
1.7 Cost-Benefit Analysis and Monetary Valuation of the Environment	
1.8 Research Topics in Environmental Economics	
1.9 Economics of Water Pollution	
Chapter-2 RESEARCH DESIGN AND SURVEY PROCEDURES IN ENVIRONMENTAL ECONOMICS	18-40
2.1 Introduction	
2.2 Stages of Research Design	
2.3 Steps of a Survey	
2.4 Survey Planning	
2.5 Analysis of Survey Data	
2.6 Census versus Sample Surveys	
2.7 Environmental Survey Procedure	
2.8 Environmental Field Survey Methods	
Chapter-3 BASELINE SURVEY IN ENVIRONMENTAL ECONOMICS	41-71
3.1 Introduction	
3.2 Importance of Baseline studies	
3.3 Baseline Survey Requirements	
3.4 Timing of Baseline Survey	
3.5 Identification of Indicators for Baseline Survey	
3.6 Types of Baseline Survey Indicators	
3.7 Baseline Study Considerations	

- 3.8 Relevance of Baseline to Policy
- 3.9 Baseline Survey Methodology
- 3.10 Need for Baseline Information
- 3.11 Utility of Baseline Data in Environmental Regulation
- 3.12 Porter Hypothesis in Relation to Technologies Change
- 3.13 Baseline Survey on Environmental Impact of Cultural Heritage
- 3.14 Baseline Survey on Water, Health and Sanitation
- 3.15 Water and Hygiene Baseline Survey

Chapter-4 EXPERIMENTAL METHOD IN ENVIRONMENTAL ECONOMICS 72-92

- 4.1 Introduction
- 4.2 Basic Concepts in Experimentation
- 4.3 Factors of Experimental Methods
- 4.4 Inferring Causal Relationships
- 4.5 Experimental Process
- 4.6 The Basis for Comparing Treatments
- 4.7 Data Collection
- 4.8 Analyzing Data
- 4.9 Experiments in Environmental Economics
- 4.10 Link between Experimental Method and Environmental Economics
- 4.11 Public Good Experiments
- 4.12 Extensions of the Standard Design
- 4.13 Methodological Issues in Experimental Method

Chapter-5 DIAGNOSTIC RESEARCH METHODS IN ENVIRONMENTAL ECONOMICS 93-102

- 5.1 Introduction
- 5.2 Basis of Diagnostic Research
- 5.3 Diagnostic Research Steps
- 5.4 Rule Based Reasoning in Diagnostic Research
- 5.5 Diagnosing Social-Ecological Systems
- 5.6 Limited Diversity Need in Diagnostic Research
- 5.7 Multiple Levels of Causation
- 5.8 Ostrom's Diagnostic Research Design
- 5.9 Diagnostic Method in Climate Change Research

Chapter-6 BASIC CONCEPTS OF ECONOMIC VALUE 103-117

- 6.1 Introduction
- 6.2 Valuation of Ecosystem Services
- 6.3 Factors Influencing the Ecosystem Management Decisions
- 6.4 Types of Environmental and Economic Values

6.5	Benefit Estimation in Conservation Programmes	
6.6	Clue about Relative Value Indicators	
6.7	Production and Investment Values	
6.8	Valuation through Benefit-Cost Analysis	
6.9	Discounting	
Chapter-7	ENVIRONMENTAL VALUATION METHODS	118-152
7.1	Introduction	
7.2	Market Price Method	
7.3	Productivity Methods	
7.4	Hedonic Pricing Method	
7.5	Travel Cost Method	
7.6	Damage Cost Avoided, Replacement Cost, and Substitute Cost Methods	
7.7	Contingent Valuation Method	
7.8	The Contingent Choice Method	
7.9	Benefit Transfer Method	
Chapter-8	ENVIRONMENTAL BENEFIT VALUATION	153-180
8.1	Introduction	
8.2	Benefits Analysis Methods	
8.3	Steps in Benefit Analysis	
8.4	Economic Valuation and Benefits Assessment	
8.5	Benefits of Environmental Improvements	
8.6	Methods of Studying Environmental Benefits	
8.7	Revealed Preference Methods in Studying Environmental Benefits	
8.8	General Application of Production and Cost Functions	
8.9	Averting Behaviors Methods in Benefit Valuation	
8.10	Cost of Illness	
8.11	Stated Preference Method in Benefit Valuation	
8.12	Test-Retest Approach in Benefit Valuation	
8.13	Test Validity Methods in Environmental Valuation	
8.14	Combining Revealed and Stated Preference Data	
8.15	Benefit Transfer	
Chapter-9	ECONOMIC VALUATION OF NATURAL RESOURCES	181-189
9.1	Introduction	
9.2	Valuation of Commercial Fishers	
9.3	Application of Economic Tools in Coastal Management Decision Making	
9.4	Inputs and Outputs in Marine Valuation	
9.5	Measuring Producer Surplus without Estimating Supply	
9.6	Economic Tools Use in Coastal Management Decision Making	

Chapter-10 SOCIAL COST AND ENVIRONMENTAL REGULATION	190-205
10.1	Introduction
10.2	Partial Equilibrium Analysis of Social Cost of Environmental Regulation
10.3	General Equilibrium Analysis of Social Cost of Environmental Regulation
10.4	Social Cost and Employment Effects of Environmental Regulation
10.5	Alternative Concepts of Cost of Environmental Regulation
10.6	Choice Between a Static and Dynamic Framework
10.7	Issues in Estimating Social Cost of Environmental Degradation
10.8	Models Used in Estimating the Costs of Environmental Regulation
10.9	Compliance Cost Models in Environmental Regulation
10.10	Input-Output Econometric Models
10.11	Computable General Equilibrium Models
Chapter-11 ECONOMIC VALUATION OF WETLANDS	206-218
11.1	Introduction
11.2	The Economic Values of Wetlands
11.3	Wetlands Resource Undervaluation Issues
11.4	Wetland Valuation in Ramsar Conservation
11.5	Wetland Evaluation Process
11.6	Time and Discounting in Economic Valuation of Wetlands
11.7	Wetland Impact Analysis
11.8	Total Valuation of Wetlands
11.9	Scope and Limitation of the Wetland Valuation
Chapter-12 FOREST ECONOMIC VALUATION	219-239
12.1	Introduction
12.2	Contribution of Forestry Sector to GDP in different Countries
12.3	Treatment of Capital Formation in the Forestry Sector
12.4	Benefits and Beneficiaries of Forest landscapes
12.5	Review of Forest Valuation Studies
12.6	Valuation Issues in Forest Landscape
12.7	Research Needs in Forest Landscape Valuation
12.8	Benefit Transfer in Valuation of Forest Landscape
12.9	Sampling and Aggregation in Forest Valuation
12.10	Embedding in Valuation of Forest Landscape Valuation
12.11	Valuation of Forest Recreation
12.12	Valuation Issues in Forest Recreation
12.13	Research Needs in Forest Recreation
12.14	Benefit Transfer in Valuation of Forest Recreation

15.15	Research Needs in Forest Benefit Transaction	
12.16	Willingness to accept and Willingness to pay in Valuation of Forest Recreation	
Chapter -13 ECONOMIC TOOLS IN WATER POLLUTION ANALYSIS		241-252
13.1	Introduction	
13.2	Diesel Pollution Study	
13.3	Soil Remediation-Cleaning Soil and Ground Water	
13.4	Ground Water Contamination Effects on Health	
13.5	Contamination due to Ground Water Storage Tanks	
13.6	Ground Water Contamination Study	
13.7	Econometric Model on Environment and Sustainable Development	
Chapter -14 ENVIRONMENTAL INDICATORS		253-276
14.1	Introduction	
14.2	Characteristics of Environmental Indicators	
14.3	Indicators for Environmental Programme	
14.4	Indicators of Environmental Monitoring	
14.5	Air Quality Parameters	
14.6	Meteorological Parameters	
14.7	Humidity Parameters	
14.8	Rainfall Parameter	
14.9	SO ₂ Monitoring	
14.10	Environmental and Socio-Economic Indicators	
14.11	Three Concepts Related to Indicators Environmental Protection Investment	
14.12	Statistical Scope of Indicators of Environmental Protection Investment	
14.13	Statistical Method of Environmental Protection Investment Indicators	
14.14	Major Problems in Measurement of Indicators of Environmental Protection Investment	
14.15	Criteria for Indicators of Environmental Protection Investment	
14.16	Sampling Frequency for Temporal Trend Studies	
14.17	Exposure to Environment	
Chapter -15 ENVIRONMENTAL INDEX		277-292
15.1	Introduction	
15.2	Environmental Sustainability Index	
15.3	Product Sustainability Index	
15.4	Indicators by Global Reporting Initiative	

- 15.5 Ethibel Sustainability Index
- 15.6 Index of Environmental Friendliness
- 15.7 Minimal Manufacturing Index
- 15.8 Eco-Efficiency Indicators
- 15.9 Measuring Environmental Performance of Industries
- 15.10 Water Footprint and Water Impact Index

Chapter -16 BASIC STATISTICAL TOOLS IN ENVIRONMENTAL RESEARCH

293-318

- 16.1 Introduction
- 16.2 Application of Statistics in Environmental Research
- 16.3 Features of Environmental Statistics
- 16.4 Common Parameters and Statistics
- 16.5 Measures of Association
- 16.6 Data Transformations and Standardizations
- 16.7 Adaptive Sampling in Environmental and Ecological Research
- 16.8 Linear Models in Ecological and Environmental Assessment
- 16.9 Quality Assurance and Data Quality
- 16.10 Structural Hypothesis Testing
- 16.11 The Modeling Process in Environmental Research
- 16.12 Environmental Data Type and Scale
- 16.13 Multi-Scale Ecological Assessment
- 16.14 Statistical Methods in Environment Research Area

Chapter -17 SAMPLING METHODS

319-338

- 17.1 Introduction
- 17.2 Non-Probability Sampling
- 17.3 Types of Non-Probability Sampling
- 17.4 Probability Sampling
- 17.5 Probability-Proportional-to-Size (PPS) Sampling
- 17.6 Methods of Probability-Proportional-to-Size Sampling
- 17.7 Stratified Sampling (STR)
- 17.8 Multi-Stage Sampling
- 17.9 Multi-Phase Sampling
- 17.10 Replicated Sampling
- 17.11 Special Areas in Sample Design
- 17.12 Entry/Exit Surveys
- 17.13 Snowball Sampling

Chapter -18 DATA COLLECTION METHODS

339-349

- 18.1 Introduction
- 18.2 Basic Data Collection Methods
- 18.3 Interviewer-Assisted Methods

18.4	Personal Interviews	
18.5	Choosing between Self-Enumeration and Interviewer-Assisted Methods	
18.6	Computer-Assisted Data Collection	
18.7	Other Methods of Collection	
18.8	Direct Observation	
18.9	Electronic Data Reporting (EDR)	
18.10	Supplementary and Omnibus Surveys	
Chapter -19	TOOLS OF DATA COLLECTION	350-368
19.1	Introduction	
19.2	The Questionnaire Design Process	
19.3	Review and Revise the Questionnaire	
19.4	Pretesting	
19.5	Behavior Coding of Interviewer/Respondent Interactions	
19.6	Pilot Test	
19.7	Types of Questions: Open versus Closed	
19.8	Guidelines for Wording Survey Questions	
19.9	Sources of Response Error	
19.10	Questionnaire Frequency	
19.11	Processing Considerations in Questionnaire Design	
Chapter -20	HEDONIC REGRESSION	369-373
20.1	Introduction	
20.2	Hedonic Pricing Method	
20.3	Hedonic Models and Real Estate Valuation	
20.4	Application of Hedonic Pricing Method	
20.5	Advantages of Hedonic Regression	
20.6	Limitations of Hedonic Regression	
Chapter -21	APPLICATION OF FACTOR ANALYSIS IN ENVIRONMENTAL RESEARCH	374-386
21.1	Introduction	
21.2	Principal Components Analysis	
21.3	Application of Factor Analysis in Air Pollution Studies	
21.4	Application of Factor Analysis in Water Pollution Studies	
21.5	Application of Factor Analysis in Ground Water Pollution Studies	
21.6	Application of Factor Analysis on Seas and Ocean Pollution Studies	
21.7	Application of Factor Analysis in Water Supply, Waste and Sewage Water	
21.8	Application of Factor Analysis in Land Pollution Studies	

Chapter -22 ENVIRONMENTAL DAMAGE PREVENTION MODELS	387-395
22.1 Introduction	
22.2 Present Status of Planning Models	
22.3 Multisectoral General Equilibrium Model	
22.4 Emission Submodel	
22.5 Forecasts of Emissions to Air and the Effects of Fluctuating Energy	
22.6 Alternative Models	
22.7 Life under a CO ₂ Ceiling	
Chapter -23 ENVIRONMENTAL ACCOUNTING	396-419
23.1 Introduction	
23.2 Need for Environmental Accounting	
23.3 Basic Dimensions of Environmental Accounting	
23.4 Structural Elements of Environmental Accounting	
23.5 Environmental Conservation Cost	
23.6 Categorizing Environmental Conservation Cost for Trade Associations	
23.7 Environmental Conservation Benefit	
23.8 Method for Measuring Environmental Conservation Benefit	
23.9 Measuring Methods Related to Environmental Conservation Activities	
23.10 Disclosure of Environmental Accounting Information	
Chapter -24 GREEN ACCOUNTING	420-426
24.1 Introduction	
24.2 Shortcomings of GDP Indicators	
24.3 Importance of Green Accounting	
24.4 Objectives of Green Accounting	
24.5 Problems of Green Accounting	
24.6 Superiority of Green Accounting	
24.7 Green National Accounting System	
24.8 United Nations Environment Programme in Green Accounting	
Chapter-25 RESEARCH NEEDS IN THE CONTEXT OF CLIMATE CHANGE	427-441
25.1 Introduction	
25.2 Research Need for Monitoring Climate Change	
25.3 Research Needs to Mitigate the Green House Gas Emission	
25.4 Research Needs to Mitigate the Impact of Climate Change on Agriculture	

25.5	Research needs to mitigate the Impact of Climate Change on Biodiversity and Habitat	
25.6	Climate Change Emergency Management Research Needs	
25.7	Research needs to mitigate the Impact of Climate Change on Energy Service	
25.8	Research needs to mitigate the Impact of Climate Change on Industrial Activities	
25.9	Research needs to mitigate the Impact of Climate Change on Forestry	
25.10	Research needs to mitigate the Impact of Climate Change on Wetlands	
25.11	Research needs to mitigate the Impact of Climate Change on Rangeland	
25.12	Research needs to mitigate the Impact of Climate Change Ocean and Coastal Ecosystem and Resources	
25.13	Research needs to mitigate the Impact of Climate Change on Public Health	
25.14	Research needs to mitigate the Impact of Climate Change on Transportation	
25.15	Waste Management Research Needs in the Context of Climate Change	
25.16	Research needs to mitigate the Impact of Climate Change on Water	
 Chapter -26 RESEARCH METHODS TO ACCESS THE IMPACT OF CLIMATE CHANGE		442-480
26.1	Introduction	
26.2	Research Methods to Analyze the Impact of Climate Change on Agriculture	
26.3	Research Methods to Assess the Impact of Climate Change on Health	
26.4	Research Methods to Assess the Impact of Climate Change on Forest	
26.5	Research Methods to Access the Impact of Climate Change on Biodiversity	
26.6	Research Methods to Assess the Impact of Climate Change on Fisheries	
26.7	Research Method to Assess the Impact of Climate Change on Livestock	
 Chapter -27 RESEARCH AREAS IN ECOLOGY AND ENVIRONMENT		481-494
27.1	Introduction	

- 27.2 Ecological Economics Research Questions
- 27.3 Research in Global Climate Change
- 27.4 The Exposure of Children to Pesticides
- 27.5 Research in Ambient Air Quality
- 27.6 Research Areas in Ecological Effects
- 27.7 Research Areas in Indoor Air Quality
- 27.8 Leachability Prediction Research
- 27.9 Research in Drinking Water
- 27.10 Fate and Mobility of Contaminants in Soils and Groundwater
- 27.11 Assessment of Risks of Contaminated Soils and
Treatment Residuals
- 27.12 High Performance Computing
